

Flow Chart – Medication

Medication – Any medication will only be administered by staff who has received an appropriate level of medication administration training.

Staff will only administer medication to a participant when it has been prearranged and documented by the Operations Manager and in line with GROW policy and procedures.

Our Medication Policy & Procedures are supported by a number of documents such as a Participant Support Plan, Behaviour Management Plan and Refusal of Medication Form.

The secure storage of medication is a priority and only authorised staff have access.
